

How to Use the Revealer Tool

1. Click on the Tool button
2. Select Revealer
3. The flipchart will appear black with a white X
4. Each section of the X represents an area where you can click and drag to reveal the flipchart in the desired direction
5. Click the Tool button again and select the Revealer to turn it off (This gets rid of the check mark next to Revealer)
6. *You must turn off the revealer or it will be on every page of your flip chart
7. Another way to assign the revealer to certain flipchart pages and not others is through the Property Browser:
 - a. Tools Section> On the drop down list select Page Tools Off

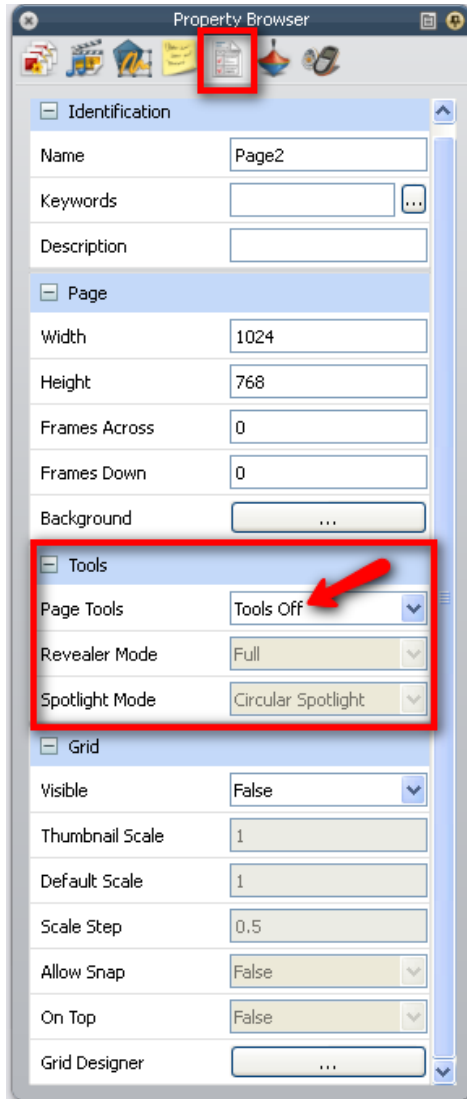

ActivInspire Quick Tip: Revealer Off

By *aimee.martin*

When creating flipcharts, you may want to preset the Revealer Tool on a certain page. But, pages before and after sometimes get stuck with the Revealer on them too. What can you do to fix this? In the Property Browser, go to the Tools section and Page Tools category. Make sure "Tools Off" is selected from the drop-down menu on the pages directly before and after the page where you want the Revealer.
